## Modernize Your Development Methodology

The Essential Framework allows you to create applications in minutes, instead of days or weeks. How...?

EF equips developers with an extensive set of patterns and libraries which allow you to concentrate on building the actual application. Developers do not have to focus on the necessary but tedious tasks: (1) getting or securing data, (2) drawing reports, (3) performing basic C.R.U.D. functions, (4) recreating common patterns, such as comments or attachments. Instead, developers can focus on the deliverable.

EF does so with standards-based technologies such as: CSS, HTML and JavaScript, allowing for complete developer extensibility.

Create New Pattern	Export Pattern
	Basic C.R.U.D.
	Advanced C.R.U.D.
	Comments
	Attachments
	Edit History
	Associated Docs
	Project Milestone Task
	Discussion
	Document Library
	Prospect/Interaction
	Questionnaire/Survey
	External DB/SQL Pass-through
	People Picker
	Workflow Parallel & Serial
	Notes Outline Manager

## Creating a View Profile

**STEP 1: Create a View Profile by clicking 'Create View Profile' in the View Profile view**

**STEP 2: Fill out the View Profile Basics Section**

- Enter a View Profile name

**STEP 3: Fill out the View Profile Display Setting section**

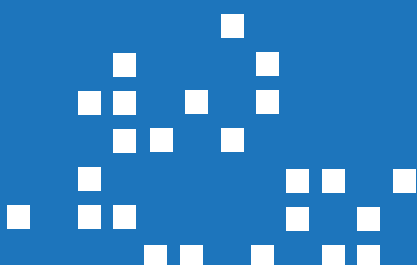

- Select a Data Profile to serve as the data source for the web view
- Enter a descriptive title for the view

**STEP 4: Fill out the Columns section**

- Select data columns from the Data Profile and enter display names
- Click 'Save' and then open the created view in a browser

**STEP 5: Configure the view using a browser**

- Drag the columns you would like to view from Hidden to Visible
- Once your report is complete you can click on 'Save Interface'
- There is no limit on the number of interfaces you may create
- Users can view, modify, extend and create new interfaces of their own
