Monitoring EVERYTHING with VitalSigns

VitalSigns takes a deep dive into both IBM and Microsoft collaboration landscapes. Monitoring the critical components of each technology allows administrators to easily identify bottlenecks and other anomalies that can affect overall performance. In-depth trend reports help to avoid reoccurring issues and to highlight areas of the environment that may need additional attention or resources.
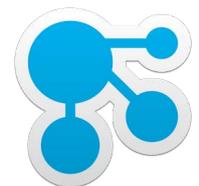

IBM Notes/Domino

Increase the performance and availability of your entire Notes/Domino landscape with VitalSigns proactive monitoring and trend analysis.

Microsoft Exchange

Emulate user transactions and monitor mailbox database capacity to mitigate performance issues before they result in failures.

IBM WebSphere

Maximize up time and identify the root cause of slow and malfunctioning enterprise applications with 24/7 performance monitoring.

Microsoft SharePoint

Analyze response time, disk space and CPU usage and act to minimize latency, improve page load time and to predict future drops in performance.

IBM Connections

Leverage end-to-end monitoring techniques to foster adoption and identify bottlenecks that can negatively impact end-user experience.
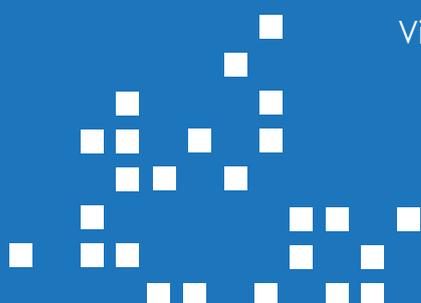

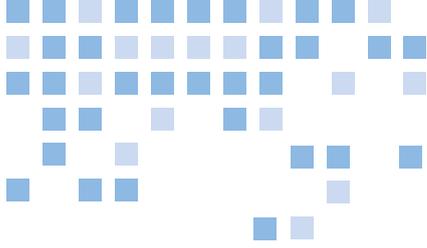

Microsoft Office 365

Track component specific analytics and identify Office 365 licenses that are eligible for reassignment to reduce the costs of your investment.

IBM Sametime

Constantly test and alert on the performance and availability of messaging systems to ensure seamless communication.

Microsoft Teams & Skype for Business

Continually test and alert on the performance and availability of Microsoft instant messaging systems to alleviate and avoid performance issues.

Monitoring the Collaborative Landscape

VitalSigns Monitoring Portfolio for both IBM and Microsoft Collaboration Suites

IBM Domino
Notes | Traveler | WebSphere

Microsoft Exchange
Outlook | On-premises | Cloud

IBM Connections
On-premises | Cloud

Office 365
OneDrive | Skype | SharePoint

IBM Sametime
Domino | WebSphere

Mircosoft Teams
Adoption | Availability

With VitalSigns Performance Monitoring you can...

Track End-User Experience
With end-to-end monitoring to improve overall performance and to increase adoption rates

Identify Real Up Time
To be aware of the actual up time of your environment to assure provider and SLA compliance

Stay Proactive
Whether you're in the office or on the go, receive alerts and act before problems affect end-users

Analyze the Entire Environment
From a unified dashboard view, to quickly analyze the overall health of your environment
