A Single Solution to Optimize Your IBM Connections Investment

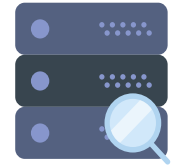

Drive Adoption

Leverage continuous usage and activity insights to reveal approaches to accelerate adoption for users in the "second wave" group.

Access Analytics

Understand how Connections is being leveraged within your environment by drilling down into global, community or individual user metrics.

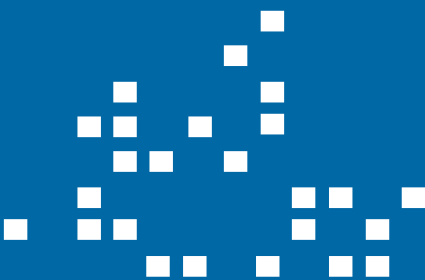

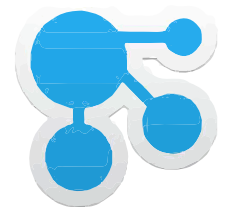

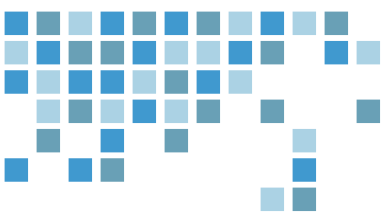

Monitor Performance

Gain visibility into the entire Connections delivery chain in real time to target troubleshooting and to ensure SLA requirements are being met.

IBM Connections Monitoring & Reporting Focus

- Usage & Adoption Insights
- Real Time Dashboard
- Trend & Activity Reports
- Proactive Alerts & Notifications
- WebSphere & DB2 Availability
- End-to-End Monitoring
- Connections Content Manager
- Health & Availability Monitoring
- Internal Champion Identification
- Optimal Resource Allocation

Optimize IBM Connections with VitalSigns Monitoring

Driving Adoption in Connections

- Ensure a smooth end-user experience with simulations of user activities.
- Share the story of 'Internal Champions' within the organization to accelerate adoption.
- Analyze user activity in real time to gather essential adoption insights.
- Identify new use cases to help drive adoption across all communities.

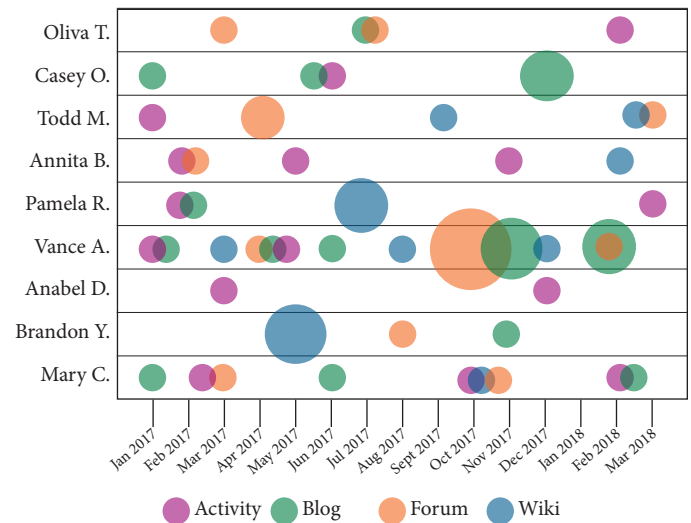

Monitoring Connections Performance

- Real time monitoring allows managers to identify and act on performance degradation before failure occur.
- Monitor the availability of all underlying components that can impact the performance of Connections.
- Analyze trend reports to identify and eliminate reoccurring issues within Connections.

Connections Content Management

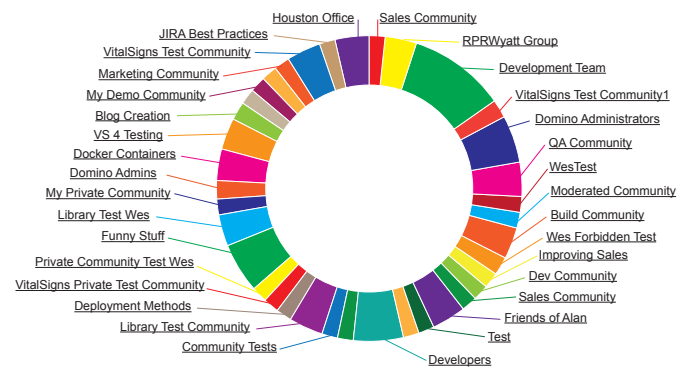

- Identify the most popular content across your entire Connections environment.
- Get alerts on Community Files storage before the quotas are reached.
- Analyze Community activity to see which users are generating the most content.
- Identify and eliminate inactive communities to conserve resources.

Internal Champions Report

Identify which users are most active within each component of IBM Connections. Internal Champions can help add credibility to any adoption strategy.

Most Popular Content Report

Identify the most popular communities across your entire Connections environment. Drill down further to identify the most popular content within each community.

About Us

VitalSigns is the premier monitoring solution from RPR Wyatt, a USA based IT organization. For over eighteen years RPR Wyatt has created administration tools designed to enhance organizational collaboration, improve user experience, empower administrators, and lower operational IT costs. RPR Wyatt is a Microsoft and IBM Advanced Business Partner.

Ready for IBM Collaboration
