

IBM Collaboration Stack Monitoring and Reporting

VitalSigns Monitoring Portfolio for the Complete IBM Collaboration Stack

IBM Connections
Adoption | WebSphere

IBM Domino
Notes | Apps | DBs

IBM WebSphere
FileNet | Applications

IBM Sametime
Domino | WebSphere

IBM Traveler
iPhone | Android | Users

IBM Verse
On-Premises | Cloud

Maximize the Performance & Availability of IBM Domino with VitalSigns

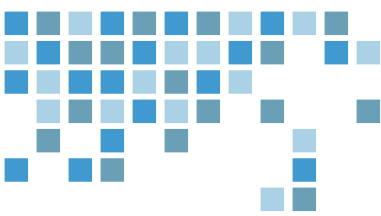

For many organizations IBM Domino servers are the backbone of collaboration, making it critical to ensure a smooth end-user experience. VitalSigns enables administrators and IT managers to achieve and maintain highest level of performance and availability of their Domino, Notes, WebSphere, Connections, Sametime and Traveler environments.

VitalSigns simulates an end-user to analyze what's happening to servers in real time to identify any potential disruptions with the end-user experience. In-depth usage analytics and proactive alerts provide IT managers with a systematic assurance of resources. All data generated from VitalSigns can be easily exported to Excel to share with team members VitalSigns uses the native Notes client for all testing so nothing is required to be installed on the Domino servers.

VitalSigns Domino Monitoring Focus

- Track User Experience with End-to-End Performance Monitoring
- Identify Bottlenecks & Target Troubleshooting with Real Time Views
- View Dedicated Health Pages with KPIs for each Domino Component
- Configure Alerts to Mitigate Issues Before Failures Occur
- Generate & Share Reports to Identify Trends in your Environment

Dive Deep into IBM Collaboration Monitoring

IBM Connections

- Improve usage & accelerate adoption
- Dedicated Executive Overview (daily)
- Identify Internal Champions
- Comprehensive content management

IBM WebSphere

- Visibility into all applications on WebSphere
- Detect the root cause of memory leaks
- Capacity planning & resource allocation
- Thread pool, JVM and memory statistics

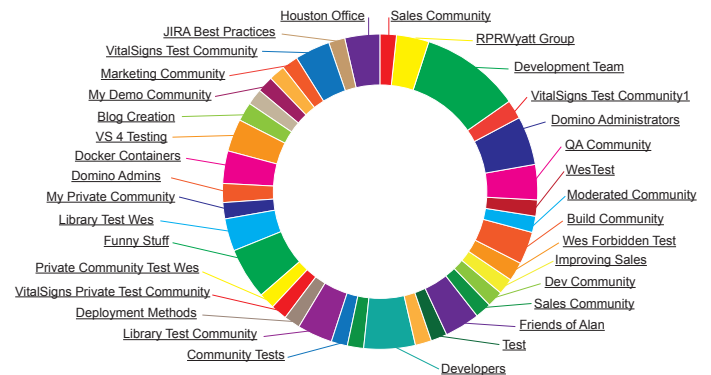

IBM Traveler

- Test QoS from an end-user perspective
- Properly allocate active HTTP threads
- Continuous device sync monitoring
- Ensure availability of the Traveler Servlet

IBM Sametime

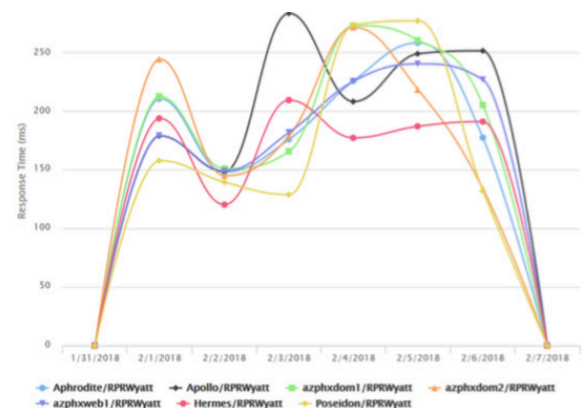

- Gather in-depth chat and meeting statistics
- Monitor total and unique logins
- Simulate an end-user to analyze availability

Most Popular Content Report

Identify the most popular communities across your entire Connections environment. Drill down further to identify the most popular content within each community.

Domino Response Time

View the response time of every server in the environment. Drill down to on individual servers for more in-depth performance metrics

About Us

VitalSigns is the premier monitoring solution from RPR Wyatt, a USA based IT organization. For over eighteen years RPR Wyatt has created administration tools designed to enhance organizational collaboration, improve user experience, empower administrators, and lower operational IT costs. RPR Wyatt is a Microsoft and IBM Advanced Business Partner.
