RPR Wyatt's Portfolio of IT Management Products & Services

**Essential Tools**  
ACL Enforcement

**VitalSigns Monitoring**  
Collaboration | IBM | Microsoft

**Essential Agent Master**  
Agent Management

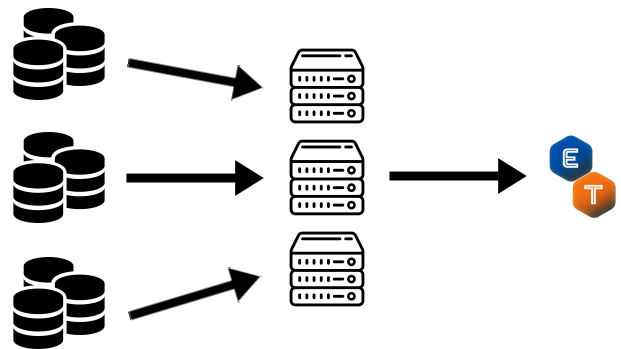

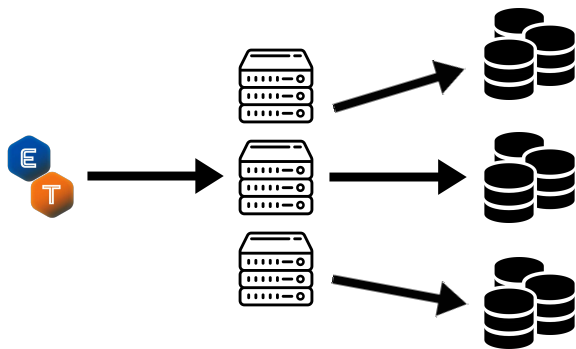

**Essential Framework**  
Data Export | App Modernization

**Expert IT Services**  
Consulting | Custom Development

**Expert IT Support**  
Administration | Technical

**Push updates such as ACL enforcers to your servers to be distributed to the correct database.**

**Pull critical information, such as unreferenced mail accounts from your environment.**

## An Administrative Tool That Pays for Itself

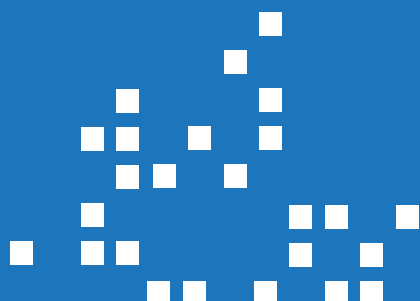

- **ACL Enforcement:** Create and enforce ACL requests in minutes rather than days.
- **Acquisition/Termination:** Add or remove mass amounts of users to/from your Domino environment in one day.
- **Database Resource Management:** Identify unused databases, most used databases and unreferenced mail accounts (orphaned mail files) to properly manage and allocate your resources.
- **Copy Entry:** Instantly assign any user identical access levels as another user in your environment.
- **Admin Process Assistance:** ET provides a report identifying Databases without a proper Administration Server setting before any issues can arise.

## So Many ACLs...So Many Regulations and Risk...So Little Time

Essential Tools (ET) collects enterprise information about your organization's servers, databases and ACLs. This crucial information is presented in a single central location for ease of analysis. Extensive changes can be initiated by a simple document populated by easy point and click actions.

ET's robust architecture ensures fast, efficient execution - all in the background. The transaction creation and execution is fully secured with well-defined rules and all transaction processing is fully logged for **audit trail and compliance** purposes.

- ❖ ET **quickly identifies major security leaks** that otherwise may be missed
- ❖ ET upgrades your security by **enforcing ACLs** and creating audit trails for all your admin changes
- ❖ ET allows you to **delegate administrative tasks** to junior administrators, but still keeps you in control
- ❖ ET enables you to **detect and verify changes** (ACL and database) to maintain your desired settings
- ❖ ET **identifies both** database activity and inactivity as well as orphaned mail files

## Leverage A Robust Administrative Process Even with Limited Resources

- + **ACL Enforcers** — Identify and act on violations
- + **Database Activity** — Get rid of those unused space eaters
- + **Orphaned Mail Files** — Maintain an efficient user environment
- + **Global Request Processing** — Perform enterprise wide requests with a single action
- + **Server Request Processing** — **Processing offloaded to server to speed up your workstation??**
- + **Robust Registration and Termination Process** — Comprehensively address the employment cycle
- + **Database Properties** — Monitor and manipulate a variety of database properties to at your command
- + **Mail Notifications** — **Establish milestone(threshold?) notifications?**
- + **Managing Mail Files ACLs** — One request... multiple mail file ACLs set
- + **Flexible Requests** — **No special client required??**
- + **Schedule Requests** — **Get back in control??**
- + **Delegate Requests** — Maximize staff capability and efficiency while remaining in control

### About Us

VitalSigns is the premier monitoring solution from RPR Wyatt, a USA based IT organization. For over eighteen years RPR Wyatt has created administration tools designed to enhance organizational collaboration, improve user experience, empower administrators, and lower operational IT costs. RPR Wyatt is a Microsoft and IBM Advanced Business Partner.
