VitalSigns

Office 365

WE PROVIDE
SMART TOOLS
TO ENHANCE MICROSOFT OFFICE 365

Who We Work For

Senior Management
Highlight areas where value can be realized and where ROI can be increased

Administrators
Identify trends, delegate tasks and reallocate resources to maximize efficiency

End Users
Reduce downtime and properly reallocate resources to ensure an optimized end user experience

Security Managers
View Audit Trails and manage who has access to what with AD role-based delegation

HOW WE WORK

VitalSigns combines resource and performance monitoring with enterprise administration features to help you effectively manage all of Office 365. VitalSigns includes dedicated health pages, trend reporting, proactive notifications and real time dashboards for ALL Office 365 components and technologies.

PowerScripts, the core administrative feature in VitalSigns, is an encrypted library of PowerShell commands that can be run on-demand with the click of a button. Administrators have full control of permission levels allowing them to easily delegate commands to users based on their role within Active Directory. PowerScripts can be run against servers, mailboxes or users on any technology that supports PowerShell.

WE PROVIDE
SMART TOOLS

TO GROW MICROSOFT OFFICE 365

Optimize performance, ensure availability and realize cost savings in Microsoft Office 365, Teams, Exchange, SharePoint, Skype, and OneDrive.

PowerScripts

Run PowerShell commands with the click of a button and enable junior admins with role-based delegation. View an Audit Log to easily monitor who ran what script, and when.

License Reallocation

Realize cost savings by identifying unused and underutilized accounts consuming licenses that can be reallocated to new users or existing users.

WHAT'S INSIDE

Teams Admin

Get insights into the number, membership, and guest access of all Teams across the tenant and easily manage Office 365 Groups with bulk management actions.

Resource Management

Monitor cloud resources in real-time to ensure that users have access, anytime and anywhere, to the tools, data, and individuals needed to perform their job function.

WHY
VITALSIGNS?

VitalSigns is a powerful monitoring and administration solution right out-of-the-box, and can easily be extended and customized to meet specific environmental needs. The configurator makes it easy to set custom parameters and quotas that allow administrators to proactively identify inefficiencies and potential issues before end-users experience a disruption in service. The PowerScripts feature of VitalSigns works as an administrator force multiplier, enabling seamless and secure delegation of scripting workloads. In short, VitalSigns is the most comprehensive solution to effectively **monitor and administer Office 365** and related technologies.
